

CIS 321 PROJECT MILESTONE (2): Mapped Tables Filled with data and SQL Query Statements Sample

Mapped Tables Filled with data (5 Marks)

ER Diagram :

MAPPING of your ER diagram into Database Schema:

Result of mapping the COMPANY ER schema into a relational database schema.

EMPLOYEE

gender	adress	<u>Ssn</u>	Last name	First name	Middle name	Birth date	Super ssn	Works for	hours
--------	--------	------------	-----------	------------	-------------	------------	-----------	-----------	-------

BRANCH

<u>Branch id</u>	name	<u>Supplier id</u>	Start date
------------------	------	--------------------	------------

PRODUCT

<u>Barcode</u>	name	Branch id
----------------	------	-----------

SUPPLIER

<u>Supplier id</u>	C name
--------------------	--------

BRANCH LOCATIONE

<u>Blocatione</u>	Branch id
-------------------	-----------

Tables with full specification of data types for all fields, constraint and Keys:

For example

BRANCH Table

Attribute Name	Description	Data Type	Constraint
Branch_Number	Branch Identifier	INT	Primary Key, Not Null
Branch_Location	Location of the Branch	varchar(100)	Not Null
Manager_SSN	SSN of Branch Manager	char(10)	Unique, Foreign Key references EMPLOYEE(SSN), Can be Null

	Branch_Number	Branch_Location	Manager_SSN
▶	1	Riyadh Central	NULL
	2	Jeddah Waterfront	NULL
	3	Dammam Corniche	NULL
⚙	NULL	NULL	NULL

Fill Data for all Tables with 10 records:

For example

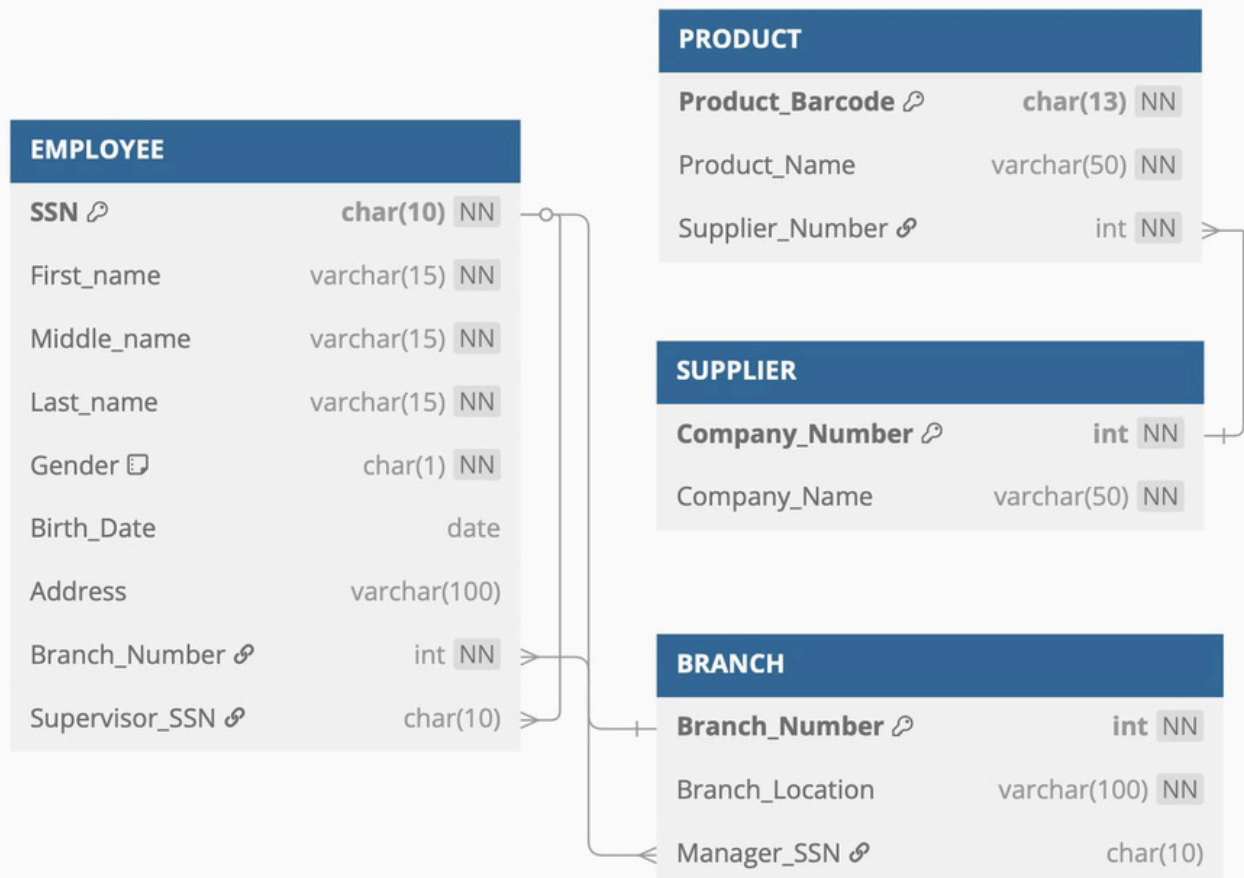

employee's Table Data

SSN	First_name	Middle_name	Last_name	Gender	Birth_Date	Address	Branch_Number	Supervisor_SSN
111223333	Ahmed	Mohammed	Ali	M	1985-05-20	123 King Road, Riyadh	1	NULL
222222222	David	James	Wilson	M	1992-07-20	456 Park Ave, New York, USA	1	111111111
333333333	mustafa	Michael	Smith	M	1980-04-10	New York	1	NULL
444444444	ali	James	Wilson	M	1992-07-20	jan	1	333333333

SQL Query Statements (5 Marks)

For example

❖ Database Diagram:

❖ Write all SQL Queries required in your system to achieve all requirements (screenshot the result for each query).

For example

1. View all students information only if there is a student whose address is not Jeddah?

```
select * FROM
employee where not
exists (
select * FROM
employee where
Address = 'Jeddah'
```

	SSN	First_name	Middle_name	Last_name	Gender	Birth_Date	Address	Branch_Number	Supervisor_SSN
	111223333	Ahmed	Mohammed	Ali	M	1985-05-20	123 King Road, Riyadh	1	NULL
	222222222	David	James	Wilson	M	1992-07-20	456 Park Ave, New York, USA	1	111111111
	333333333	mustafa	Michael	Smith	M	1980-04-10	New York	1	NULL
	444444444	ali	James	Wilson	M	1992-07-20	jan	1	333333333
